

THE WORLD'S LARGEST NON-POWERED GROUND SUPPORT EQUIPMENT MANUFACTURER

KEEP MOVING

Movement is money in your business. There simply is no time to slow down, let alone break down. Reliable ground support equipment is a must.

WASP designs, customizes and builds the industry's most dependable and durable equipment. It is easy to use, requires little maintenance, works for years, and looks great in the process.

The quality of our equipment results from more than two centuries of engineering expertise, an extreme dedication to safety, attention to detail of employee-owners who care, and capacity that only the largest non-powered ground support equipment manufacturer in the world can deliver. We're always ready to serve you and your customers.

LET'S MOVE

OUR QUALITY

ENSURES THE LOWEST TOTAL COST OF OWNERSHIP

Customers around the world have used hundreds of thousands of our products every day for decades, and they still function like new. Quite simply, we design and build equipment that works well and lasts – up to twice as long as other equipment.

HERE'S WHY OUR GROUND SUPPORT EQUIPMENT LASTS SO LONG

100 PERCENT EMPLOYEE OWNED

We own the company, so we take pride in only producing equipment we would put our own name on. Quality comes from experience; most of us have been here at least 10 years, and some for more than 30.

EXPERIENCED ENGINEERS

Our engineering team brings more than 200 years of dedicated GSE experience to creating custom designs that meet or exceed the most stringent specifications and safety regulations.

QUALITY TESTING

Every piece of equipment we manufacture has to pass the test, literally. We conduct the most rigorous product testing in the industry, using strain gauges, washboard tracks and other intensive measures.

CERTIFIED WELDERS

All of our welders are certified by the American Welding Society, so they know how to produce strong, precision welds that last.

FULL-TIME INSPECTORS

A full-time quality inspector at each of our manufacturing facilities ensures every piece of equipment meets your rigorous standards, and ours.

DURABLE MATERIALS

We use thicker-gauge steel, more strengthening ribs, premium hardware and a shot-blast/powder-coat process to ensure our products last.

ISO 9001:2008 AND CE CERTIFICATION

We've been ISO certified for more than a decade, and we can produce equipment that meets CE certification standards. It's your assurance that our practices and processes result in products that meet all quality and safety standards and regulations.

*IT ALL ADDS UP TO MINIMAL
MAINTENANCE AND LOW LIFE-CYCLE COST*

EXPERIENCE

QUALITY

DURABILITY

OUR CAPACITY

TOPS THE INDUSTRY

It's easy to see how we became the biggest. With the best people and the best equipment in our facilities, we quickly fulfill custom and standard orders for both equipment and parts, and that keeps our customers coming back for more.

MORE MANUFACTURING SPACE

Our four facilities offer enough manufacturing space to cover four professional soccer fields. Regardless of the size of your order, we'll turn it around quickly.

MORE MARKET SHARE

Great quality translates to high demand. Hundreds of thousands of pieces of serial-numbered equipment have gone out of our doors, and they're at work in all 50 U.S. states and 65 countries.

MORE EMPLOYEES

Most of our 350 employees are dedicated to the custom manufacturing process, including 70 certified welders and 15 highly experienced engineers.

MORE SPECIALIZED MACHINERY

We have more and better production machinery than anyone else:

- 7 large-format plasma and laser cutters
- 7 heavy press brakes
- 8 large-format automated saws
- 5 large-format powder-coat paint booths and ovens

MORE PARTS ON HAND

Our dedicated parts production warehouse can ship almost any part within 24 hours to minimize your downtime. We also offer parts customization for other manufacturers' products.

OUR SAFETY ENGINEERING MAKES US SECOND TO NONE

At WASP, we know how important safety is to you and your safety group. Our Engineering Department will work closely with your team to custom design components and equipment that achieve any expectation for a safe working environment. That partnership only enhances what are already the safest products in the industry.

We don't stand for breakaway parts that could cause injury or damage. Our carts and dollies track correctly to give better control and help prevent aircraft strikes. Our heavy-duty towbars exceed industry standards. Our baggage carts feature handles in the optimum place for safe lifting. Our dollies incorporate radius-cut corners to minimize damage. And our stairs use automatic latching braces to ensure there isn't human error. It's all part of our commitment to your safety.

Quite simply, our towbars won't break. Our wheels won't fall off. Our casters stay put. Our hitches work for the long haul. Every component of WASP equipment comes to fruition only after careful design and stringent testing that ensure the safety of people and aircraft.

Reduce your liability. Prevent downtime. Stay safe with WASP.

OUR SOLUTIONS

PERFORM CONSISTENTLY & RELIABLY

WASP uses a custom industrial design process with precision manufacturing to make safe, innovative, long-lasting and low-maintenance GSE that consistently lives up to your expectations.

DOLLIES

Move up to 15,000 pounds (6,800 kilograms) safely and easily with our cargo, container and turntable dollies. Durable materials, premium hardware and thoughtful design translate into equipment that holds up through years of daily use.

CARTS

Our enclosed and open carts take on as much as 8,000-pound (3,630-kilogram) loads at up to 25 mph (40 kph) to quickly transport baggage and cargo. Numerous quality options, coupled with our durable standard components, ensure you have exactly what your operation needs.

STAIRS

You can see our keen focus on safety and stability across our lines of adjustable and fixed-height stairs for passengers and crew members, as well as access stairs for maintenance and fueling. Heavy-duty towbars, automatic safety latches, hydraulic levelers – our attention to detail keeps everyone near the plane safe.

MORE GSE

We don't stop at dollies, carts and stairs. Our reliable ground support products include tail support stanchions, mobile scissor lifts, storage racks, sort platforms and walk-behind belt loaders. We can also custom design products to suit your specific needs.
