

TRAVERSING UNLOADER

The Traversing Unloader is designed to assist the unloading of cargo and baggage containers and delivery trucks at a conveyor belt. It is mounted on t-rails adjacent to the conveyor to allow the unit to traverse to several different stations. The unloader telescopes, providing a roller conveyor surface for the unloading of containers or delivery vans.

FEATURES:

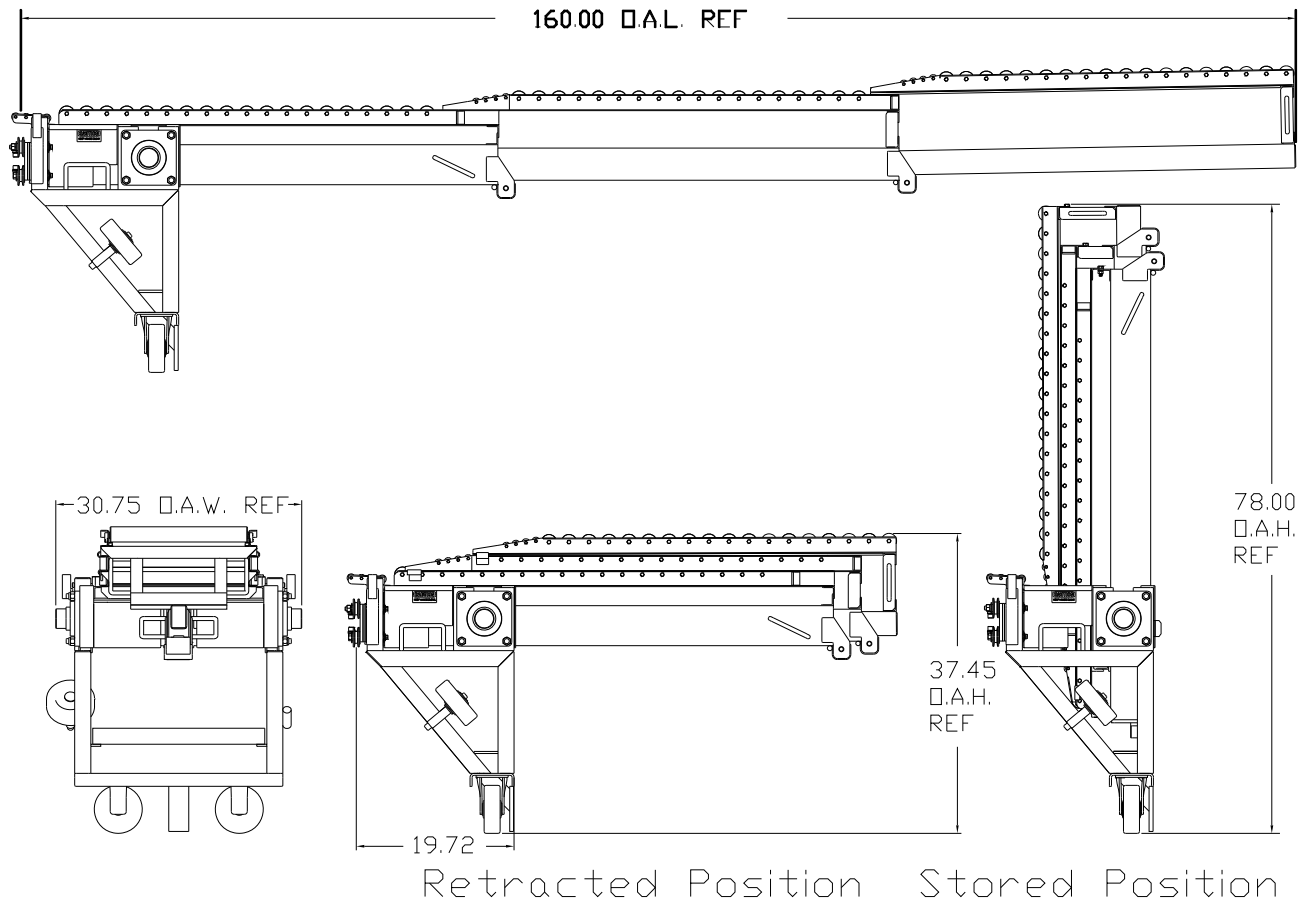

- Movable on t-rail to accommodate several locations
- Heavy duty construction to provide long life
- Unit is counter-balanced with torsion springs for ease of operation
- Steel rollers in high impact areas
- Unit stores in upright position to allow personnel passage and movement between vans, trucks and stations
