

FAST Wolverine™

Powered single-stage belted conveyor to maximize parcel unloading of ULDs.

Specifically designed for sorting facilities, the FAST Wolverine conveyor improves the speed and reliability for unloading ULDs and cargo containers. Powered extension/retraction helps the operator easily position boom at any length, up to a max of 10 ft. to reach inside containers for ease of operation. Powered hydraulic lift cylinders adjust boom's work height to align with package elevation changes and allow operator to quickly work within their power zone. Narrow boom profile and 18 in. belt width provides access into the smallest ULDs and with proper egress.

Narrow 18" belt width for access into the smallest ULDs

Boom extends up to 10 ft. to easily reach inside cargo containers

Safety bumper automatically retracts boom upon contact

Base unit ports provide quick access for repairs and replacements

Open base design for easy maintenance access to motor or hydraulic lift system

Boom elevation from 21 to 37 in. to align with package elevation changes

Product Highlights

- **Narrow profile** provides access into small ULDs with proper egress
- **Powered adjustments** allow operator to quickly work within their power zone
- **Designed with added UHMW, brush and mesh guarding** to increase operator safety in sorting facilities
- **Quick and easy access areas** for maintenance or parts replacement

SPECIFICATIONS

Overall Length	283.63 in.
Retractable Length	163.88 in.
Extendable Boom Length	119.75 in.
Boom Elevation	20.64 to 36.46 in.
Boom Operation	Powered extension/retraction & raise/lower
Machine Base Width	30 in.
Belt Width	18 in.
Belt Direction	Unload Only
Load Capacity	50 lbs./linear ft.
Belt Drive	480 volt, 2.0hp motorized pulley
Belt Speed	50 - 80 - 100 ft./min
