

# EasyLift™ Towbar

**Engineered to enhance performance and safety of operators on the ramp**

An innovative design solution for ground support equipment, the EasyLift towbar improves the ergonomics for ramp operations teams when attaching or disconnecting units. Engineered for operators to apply a consistent force through the entire range of motion when raising or lowering, the towbar will also stop at any point it is released. The EasyLift towbar requires minimal maintenance, and can either be an original equipment installation or retro-fit/replacement of existing towbars to improve performance and safety.

Operator applies consistent force when being raised or lowered

- **Brake stays engaged** in the event latch should fail
- **60% reduction** in lifting forces compared to standard towbar
- **Compatible with other FAST GSE units** for easy replacement or retrofitting

Towbar stops at any point when released in range of motion

Functions as towbar hold-up when positioned in the lower range

AIRCRAFT LOAD/UNLOAD  
FREIGHT TRANSFER  
CONVEYING OPERATIONS  
ULD/PALLET MANEUVERABILITY

**A world leader in airline, air cargo and material handling equipment** for over 40 years, FAST designs, builds, installs and services an expansive portfolio of robust, ruggedly-built, dependable equipment for today's global commerce operations.
