

3-Stage Extendable Conveyor

**Accelerate high volume unloading
of larger-size packages.**

Engineered for more robust parcel unloading, this belted conveyor easily extends into trailers, trucks or other transport vehicles, to increase the speed of product transfer operations at the door. The 3-stage design provides more reliable tracking of the boom and belt, while also reducing overall maintenance. The conveyor unit is ground mounted, increasing stability and durability, and a heavy-duty boom absorbs increased weight of packages. Optional articulating boom extension can be raised or lowered to accommodate package wall elevation changes, as well as stowed upright* to improve workflow at the door.

*Conveyor must be in fully retracted state

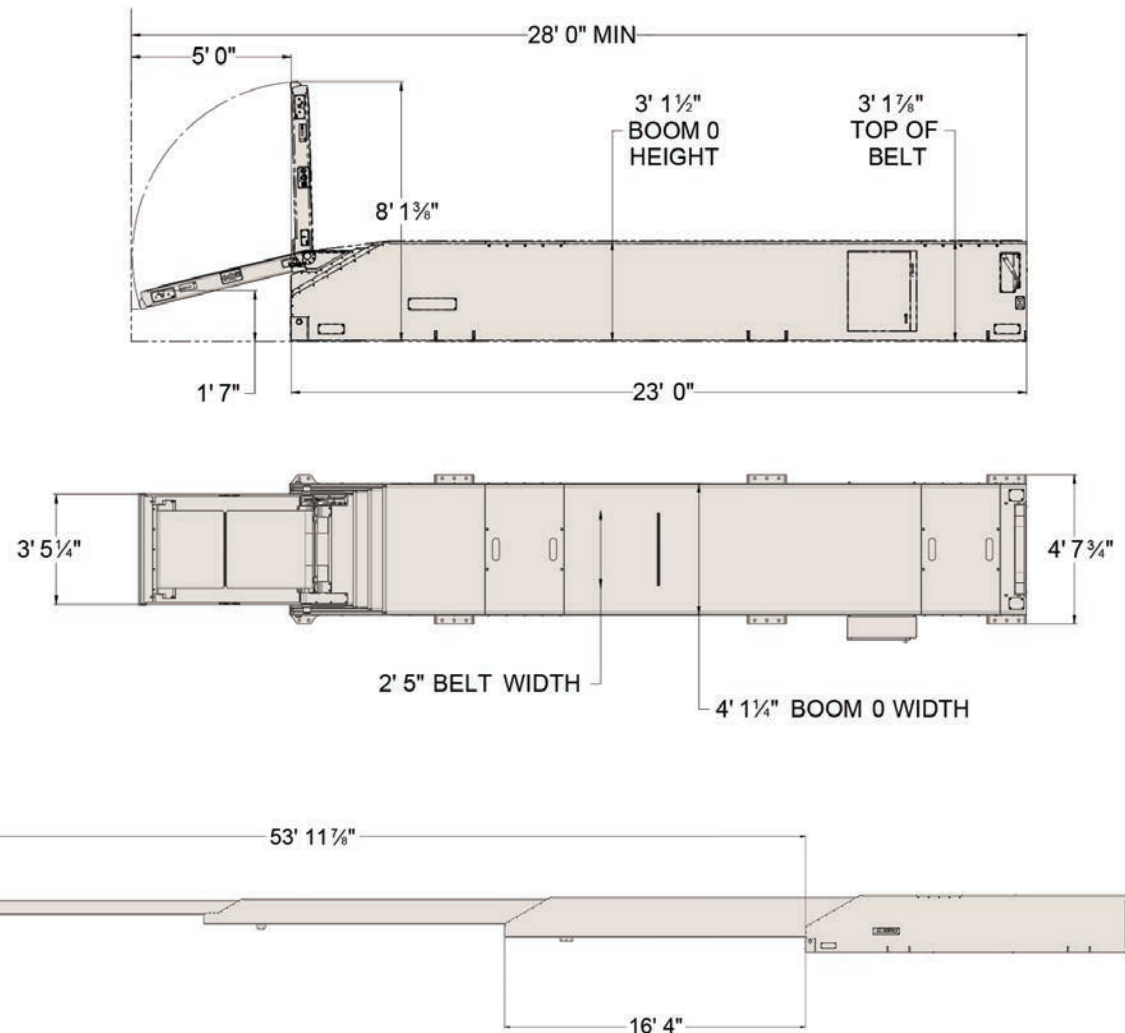

Options

- **Articulating boom extension** for ease of operation and safety
- Electrical enclosure can be mounted on **right-hand or left-hand** side depending on application

SPECIFICATIONS

Overall Length	76 ft. 9 in.
Retractable Length	23 ft.
Extendable Length	53 ft. 9 in.
Stages	3
Machine Base Width	4 ft. 1.25 in.
Belt Width	29 in.
Belt Direction	Unload Only
Load Capacity	50 lbs./linear ft.
Belt Drive	3.0hp Van der Graaf drum pulley
Belt Speed	60 ft./min.
