

Powered UNL-1063

The 42W single stage extendo and gravity unloader combo.

Incorporating the Lynx Powered unit into this gravity unloader maintains commonality across the loading and unloading docks. With the aid to the extension/retraction of the gravity unloader, operators can more easily position the units' pull-out extensions at variable lengths to align with package wall depth changes. The integrated power take off on the gravity unloader helps facilitate transition of product to the single stage keeping product moving with ease.

The Powered UNL-1063 has a footprint and reach comparable to a multi-stage. The hand crank in/out of the boom keeps costs down. The integration of the hydraulic raise/lower and electrical panel reduces the upfit costs of the unit during installation.

Options

- **Range of power requirements** for the overall unit.
- **Belt speed options** up to 70 ft/min for the single stage.
- **Oversized package guarding** for the single stage.
- **Side pan** for the single stage

SPECIFICATIONS

Battery	48 volt; operational charge lasts ≈15-25 trailers
Power Requirements	480V 3-Phase; Other options available upon request
Belt Speed	Up to 70 ft/min
Roller Size	24" High impact PVC Gravity rollers
Load Capacity	50 lbs/ft
Operation	Hand crank boom extension, Hydraulic raise & lower push buttons, belt on/off switch, assisted extension/retraction of the gravity unloader.
Travel Speed	≈ ¾ mph in both directions
Powered Force	<20 lbs. assisted push/pull force under normal conditions
Machine Base Width	4'-2 1/2" (50 1/2")
Retracted Length	18'-9 3/8" (225 3/8")
Extendable Length	54'-1 7/8" (649 7/8")
Overall Length	70'-7 7/8" (847 7/8")
