

# FAST Lynx™ Powered Unit

**Improve parcel loading operations  
and safety at the door.**

Specifically designed for FAST gravity roller loaders, the Lynx Powered Unit attaches to the front of the RTL conveyor to aid the extension/retraction of the RTL for loading flatbed trucks and trailers. This powered unit allows a single operator to steer and more easily position the RTL pull-out extensions at variable lengths, to align with package wall depth changes. All controls are accessed from the front of the unit and lights on the end illuminate the travel path as the RTL is extended, to increase the safety and ergonomics for dock operators.

The Lynx Powered Unit is engineered for quick installation to existing RTL conveyors, with no additional cutting, wiring or welding needed.

AIRCRAFT LOAD/UNLOAD  
FREIGHT TRANSFER  
CONVEYING OPERATIONS  
ULD/PALLET MANEUVERABILITY

Self-contained 48V battery  
powered unit, **requires no  
wiring for installation**

Operational handles **adjust  
from 22" to 34"** to  
accommodate operator

Brushes on **front & sides**  
**keep unit clean** and increase  
operator safety

Lights to **illuminate travel**  
path as RTL is extended

## Options

- **SR-45** steel rail RTL as direct replacement of existing FAST low-profile RTL.
- **Battery Charging Station** (Model #10-051805-01), for additional operational runtime.

## SPECIFICATIONS

<b>Weight</b>	215 lbs. fully assembled
<b>Travel Speed</b>	≈ ¾ mph in both directions
<b>Size</b>	unit adds ≈ 6.5" to front of RTL; top of unit extends from 24.5" to 36.75"
<b>Battery</b>	48 volt; operational charge lasts ≈ 15-25 trailers
<b>Powered Force</b>	<20 lbs. assisted push/pull force under normal conditions
